

The CorasWorks Solution Platform and SharePoint 2010

A powerful combination for solving your business needs

The CorasWorks Solution Platform V11 expands SharePoint 2010 to be the true business solution platform you need. We add a number of new features to the SharePoint environment. Your solutions can now focus on the business objectives and processes rather than technical issues in building your solutions. Here are a few of the benefits:

Rapid Business Solutions

- Multiple configurable displays for SharePoint data including: Grids, Charts, Calendars, Gantt Charts, Tree Navigation, Menu Navigation, and more
- CorasWorks Action Framework for no-code modification of SharePoint data
- Dynamic generation of forms for updating SharePoint data without requiring content types
- Additional field types added to SharePoint lists for data capture including:
 - Multi-lookup fields to select multiple items from external data sources
 - Auto Complete field - find results while typing
 - RTF (Rich Text Format) Field - rich text data entry that does not require the ribbon
 - Captcha - Require user to enter the image text for authentication
 - List item editor - Edit multiple items in another list based on the current item
 - Rating - Apply your own ratings to list items
 - Slider - Graphical control for entering values via mouse
- Construction of dashboards using interactive Flash charts
- Bulk emailer for distribution of SharePoint information to multiple recipients
- Complete support of multi-stage environments (development to production to staging)
- Manage your displays and actions through centralized libraries providing easy distribution of changes throughout your solutions

Powerful Enhancements to SharePoint

- Aggregation of SharePoint data from multiple data sources internal and external to SharePoint
- Data caching for improved SharePoint performance
- Triggering CorasWorks Actions on a time schedule you define using the Timer Activation Wizard
- Administrative enhancements including:
 - Site creation at any location in your site farm
 - Execute external URL actions
 - Trigger external workflows
 - Audit your site size
 - Page caching for performance increases
 - Site reviewer for professional services review and analysis of all web parts in your site farm
 - The CorasWorks Toolbar to streamline SharePoint management
- Global Variables to use within web part properties for one touch updates

The CorasWorks Solution Platform is a proven enhancement to your SharePoint environment, offering rapid business solutions in a reliable, integrated manner with no coding necessary. Contact CorasWorks today to learn more!
